8 channels can be displayed on one screen, and recording reservations can be made easily from the EPG [Electronic Program Guide].

Program schedule by time I forgot what channel it is, but it's convenient when you know the broadcast time.

8 channels of programs are displayed on a single screen.

The program title is automatically entered during recording.

Multi-channel list
TV
program g

All you have to do is display a list of programs and select a recording reservation.

"PSX" supports EPG (electronic program guide), so you can watch 8 days' worth without looking at the TV section of newspapers, etc.

Programs can be checked on the TV screen, and recording reservations can be made by simply selecting the program you want to record with the remote control.

It's easy. You can also change the display style according to your purpose, such as by time or by channel. If you display by time, 8

channels are displayed on one screen. Since the screen scrolls quickly, you can smoothly find the desired program from terrestrial

analog broadcasting and BS analog broadcasting.

booking is done!

The program title is also automatically entered.

Just select the program you want to record and press the "OK" button.

A mark is displayed on programs that have been reserved for recording.

You can also cancel your reservation from this screen.

As we can confirm program contents, it is very convenient.

Program guide by genre Recommended if you want to check the sports programs that will be broadcast this week.

Sports, drama, variety. Check programs by genre.

You can search by genre to find the program you want to watch. There are 7 types of genres such as "Sports" and "Drama", and sub-genres such as baseball, soccer, and golf are available within "Sports", so you can pinpoint your search.

[Genre list]

Genre	Terrestrial Movie		BS Movie	Drama	sports		music	variety anime
subgenre	anime live-action documentary anime/Others	international anime documentary anime/Others	General drama Historical drama Fantasy drama Others	Baseball Basket Ball Sumo Athletics Volleyball Tennis Other Ball Games	Winner motor Swimming Martial arts Golf managed sports International competitions Others	Domestic Pops International Pops Classics Jazz Enka/ Kayokyoku	Covers Karaoke Karaoke Koto Variety Others Quiz Comedy Other	

Program guide by keyword Perfect for when you know the name of the program or the names of the performers.

Create a list of programs you care about by entering keywords

For example, if you enter "Special", titles and programs will be displayed.

You can search for programs that contain that word in the description.

to come. Just by entering a keyword, you can list the corresponding

programs from the programs scheduled to be broadcast for eight days.

so it's very convenient.

Both BS analog and terrestrial analog are fully recorded on a large-capacity hard disk.

about
325
time recording

A maximum of 325 hours of recording on 250GB* .

Equipped with a large capacity hard disk of 250GB in the "PSX" body. You can easily make recording reservations from the EPG (electronic program guide), and think of up to about 325 hours of TV recording (in SLP mode) without using video tapes or DVDs.

You can enjoy it to the fullest. *For DESR-7100. The DESR-5100 has a HDD capacity of 160GB and can record up to 204 hours.

recording mode	recording time	
	HDD 250GB (DESR-7100) About 53	HDD 160GB (DESR-5100) About 33
HQ	hours About 81 hours	hours About 51 hours
HSPs	About 107 hours About	About 67 hours About 103
SP (standard)	164 hours About 217 hours	hours About 137 hours
LPs	About 325 hours	About 204 hours
EP		
SLP		

*This unit supports VBR (variable bit rate) recording, so the recording time is an estimate. *For the HDD, select 0GB or 40GB as the area for games. If 40GB is selected, the recording time will be shortened accordingly.

A "ghost reduction circuit"

All models are equipped with high-definition technology for clear recording and playback.

that suppresses the ghost phenomenon that makes high- images look dull, noise and color
The 3D Y/C separation, which controls the balance, improves the image quality of the input video signal and records it in high quality.
Furthermore, during playback, the 12-bit 108MHz video D/A converter converts digital signals into minute analog signals and reproduces them with high image quality, and the time base corrector corrects camera shake, allowing you to enjoy crisp, high-quality images. .

Image with ghost (image) Ghost reduction ON (image)

Supports
BS analog
broadcasting

With a built-in tuner, BS analog broadcasts can be recorded* .

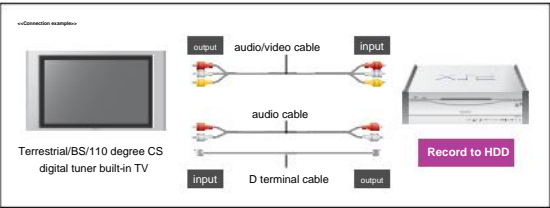

Since the "PSX" has a built-in BS analog tuner, it can directly receive BS analog broadcasts and
You can record to disc.

*WOWOW decoder cannot be connected. BS Hi-Vision is not supported.

[Caution] Recording of digital broadcasts

Most digital terrestrial, BS, and 110-degree CS programs contain copy control signals.
"Record only once", "Record prohibited"
Dubbing or moving a program that includes a copy control signal of cannot. With "PSX", programs that can be recorded only once can only be recorded on the hard disk.

* To record terrestrial, BS, and 110-degree CS digital broadcasts, a digital tuner (sold separately) or a TV with a built-in digital tuner is required. *Recording in digital high-definition image quality is not possible.

Quickly find the program you want to watch and enjoy comfortable playback.

Smooth
program play

Recorded programs can be quickly selected and played horizontally.

The list of recorded programs stored on the hard disk can be scrolled at high speed with the remote control, and automatically entered during recording.
You can easily search for the program you want to watch while checking the displayed program title. In addition, it is equipped with a variety of functions that support comfortable playback, such as a "sort function" that sorts programs by date or title, and a "flash function" that allows you to fast-forward/fast-rewind to a scene of about 15 seconds.

An image is displayed, and the contents of the program can be confirmed at a glance. It is also possible to change the image.
Display the program title and broadcast date and time.
Programs can be sorted by date, title, genre, watched/unwatched, etc.

chasing play

Even during recording, you can now "play back" from the beginning of the program.

"Chasing playback" allows you to watch the program from the beginning while continuing to record. For example, if you return home in the middle of a drama you were looking forward to, you can play it back without waiting for the recording to finish.

You can enjoy the contents in a short time, with sound, about 1.3 times faster "fast viewing playback".

*Quick playback" is convenient when you want to watch a program in a short time, such as when you are busy. With audio, you can play at about 1.3x speed.

Various simultaneous operations are possible even during recording, such as "simultaneous recording and playback".

In addition to "simultaneous recording and playback" that allows you to play another recorded program or DVD while recording, you can schedule recording, play games, and record programs even while recording to the hard disk. Operations such as editing and deleting programs can be performed at the same time.

Equipped with optical digital audio output compatible with 5.1ch theater systems.

5.1ch compatible amplifier or connect the speaker
You can watch movies while being surrounded by realistic sound, or play games.

*The screen is not final.

Horizontally! DVD creation

Create original DVDs with smooth editing and graphical menu screens.

Convenient editing

Edit while watching the flow of the scene and put it on DVD.

Easy editing with "AB erase" that allows you to cut any video scene recorded on the hard disk can do. For example, select the part you want to cut while viewing the film roll on the editing screen and edit it.

You can save only your favorite scenes. Furthermore, the joints between cut parts are automatically set as chapters, which is very convenient during playback.

Easy editing by simply selecting the part (between A and B) that you want to cut while looking at the film roll that clearly shows the flow of the scene.

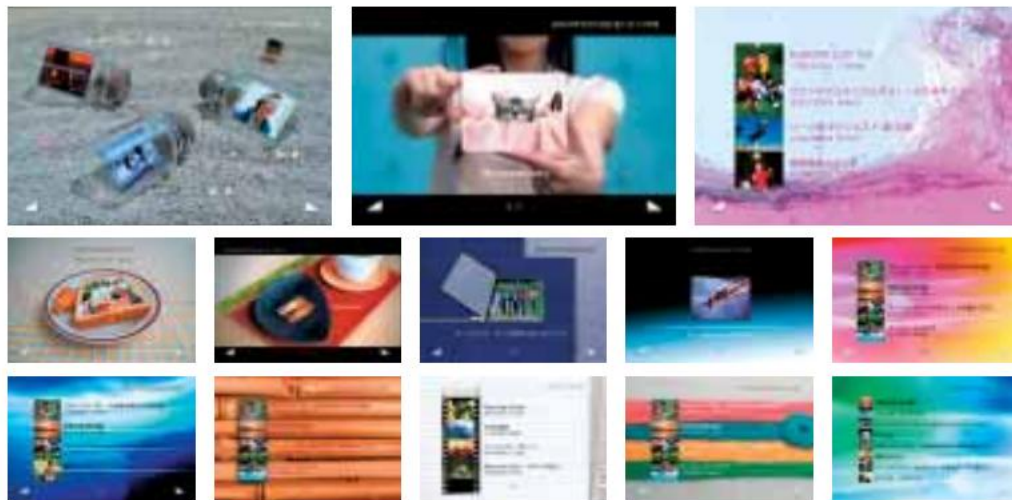

graphical DVD menu

High quality "PSX" designers Choose from a variety of 50 DVD menus.

50 beautifully designed menu screens using the "PSX" original "Graphics Synthesizer"

(Industry's largest number*1) available. You can select your favorite menu screen*2 when dubbing the video recorded on the hard disk to DVD.

About transition from analog broadcasting to digital broadcasting

Transition Schedule to Digital Broadcasting

Digital terrestrial broadcasting began in December 2003 in some of the three major areas of Kanto, Chukyo, and Kinki, and is scheduled to begin in other areas by the end of 2006. The reception area in the relevant area is initially limited, but it is planned to be expanded gradually. The national policy is to end terrestrial analog broadcasting in July 2011 and BS analog broadcasting by 2011.

Recording digital broadcasts with a recording device with a built-in analog broadcast

reception tuner You can record digital broadcasts by connecting a digital tuner (sold separately) or a TV with a built-in digital tuner to your recording device. However, the connection method differs depending on the type of recording device.

In addition, recording quality varies depending on the recording device. Some programs may not be recorded or dubbed once recorded due to copyright protection.

[Caution] Recording of digital broadcasts Copy

control signals are included in most programs of terrestrial, BS, and 110-degree CS digital broadcasts. It is not possible to dub or move a program to a DVD that contains copy control signals such as "record only once" or "recording prohibited". In "PSX", programs that can be recorded only once can be recorded only on the hard disk.

•Lead-free solder is used for soldering of main printed wiring boards. •Halogen-based flame retardants are not used in the cabinet. • 100% recycled Styrofoam is used for packaging cushioning material.

*eco info is an explanatory mark for Sony's environmental considerations.
